

76cm Series 9 Professional Pyrolytic Double Oven

Professional

Choose maximum capacity, with two independent ovens so you can cook dishes simultaneously, and an intuitive touchscreen interface.

- Guided cooking using your touchscreen makes it simple to cook by food, function or recipe
- 230L total capacity across two oven cavities, with 17 oven functions
- Non-tip, full extension sliding shelves for safe removal of hot dishes
- Accessories include a roasting dish, smokeless grill tray, and more

DIMENSIONS

Height	1232 mm
Width	760 mm
Depth	608 mm

FEATURES & BENEFITS

Cook With Confidence

Our touchscreen interface provides an intuitive guided cooking experience that helps deliver perfect results, whether you've been cooking all your life or just starting out. Cook with a favourite method, hero ingredient, or go-to cooking function or recipe.

Generous Capacity

With 115L total capacity in each oven, you have all the room you need to create several perfectly cooked dishes at once across multiple shelves.

Multi-Function Flexibility

The cooking functions have each been tailored, tested, tweaked and perfected to ensure that no matter what you're cooking, you've got the right heat to match. Purchase our Wireless Temperature Sensor accessory and precisely monitor cooking in real time (accessory sold separately).

Exceptional Performance

AeroTech™ system circulates heat evenly for a consistent temperature throughout the cavity, helping you achieve perfect results even when cooking on multiple shelves.

Self-Cleaning

Our self-clean technology breaks down food residue at a very high temperature, leaving a light ash that's easily removed with a damp cloth. The enamel coated side racks don't need to be removed when using this function.

Design Freedom

This built-in oven displays the bold stainless-steel aesthetics of our Professional style, using premium materials and elegant styling to support a cohesive kitchen design.

SPECIFICATIONS

Accessories (included)

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
