INSTALLATION GUIDE
NZ AU

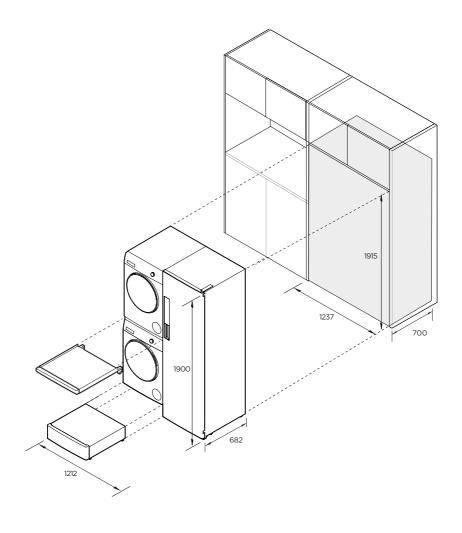

COMPONENTS REQUIRED

TOOLS					
Supplied		Not supplied			
	6mm Allen key		Box cutter		
	Spanner (washer)		Phillips #2 screwdriver		
	Spanner (plinth)		Level		
			T25 Torx screwdriver		
			Flat head screwdriver		
PARTS					
Supplied and required		Supp	olied and to be discarded		
	4x M10 bolts		2x dryer front brackets		
	2x plinth bolt hole covers		2x dryer rear brackets		
	6x short stacking kit screws		2x dryer rear mounting screws		
	2x long stacking kit screws				

ACCESSING YOUR PRODUCT SPECIFICATIONS

For full product, cabinetry and service specifications, refer to the Planning Guide. To access the Planning Guide, scan the QR code or visit fisherpaykel.com/specify. Search by appliance type, product name or model code.

PRIOR TO INSTALLATION

1. Ensure cabinetry and servicing specifications have been met and clearances have been considered.

Refer to the Planning Guide for details.

2. Ensure floor is level and clear and a finished return has been created.

3. Ensure power will remain accessible following install to allow access for any future product maintenance.

Service holes should be smooth with grommets installed where required.

Refer to the services section of the Planning Guide for more details.

UNPACK ALL PRODUCTS

Washer and Dryer:

Cut the straps and the line printed on the top of the carton. Lift to remove. Discard braces and corner posts.

Remove any packaging and accessories from the drum and base packer.

Dispose of packaging responsibly.

Fabric Care Cabinet:

Cut the straps and the line printed on the back of the carton. Cut to the nearest corner and remove sleeve. Discard braces, corner posts and sleeve.

Remove packaging and accessories from inside cabinet.

Dispose of packaging responsibly.

Plinth:

Cut the straps and tape to open the carton from the top. Remove the EPS cap before lifting the plinth out.

Set cardboard aside for later use. Ensure accessories are removed from the EPS cap before discarding EPS and rubber spacers responsibly.

UNPACK ALL PRODUCTS

1. Protect flooring before positioning products as close to the installation location as possible, ensuring enough working room is left available.

REVERSE DRYER DOOR (OPTIONAL)

Some dryer models have reversible hinge and latch fittings to allow the door to open on either the left or right side as needed. Refer to table below for applicable and non applicable models.

REVERSIBLE	NON-REVERSIBLE
DH8060J5, DH9060J5, DH8060P5, DH8060PG5, DH1060P5, DH1060PG5,	DH1060YZB5,
DH9060D5, DH9060DG5, DH1060D5, DH1060DG5, DH1060R5, DH1060RG5,	DH1060YLZB5,
DH1060T5 DH1060TG5 DH1060HI 5 DH1060HI G5 DH1060H5 DH1060HG5	DH1060MZB5

1. Unscrew hinge screw using a T25 torx screwdriver then remove door and place face down on a protected surface. Remove plugs (x8) from inner door flanges, then remove screws.

2. Insert flat-head screwdriver in access slot to pry off inner door. Rotate door 180 degrees and fit back in place.

Reattach screws, alternating between sides of the door. Replace plugs.

3. On dryer, unscrew and remove latch cover to access latch.

REVERSE DRYER DOOR (OPTIONAL)

4. Unscrew latch, and slide to remove.

5. Rotate latch and insert on opposite side of dryer. Secure with screw.

Refit and secure latch cover with latch cover screws.

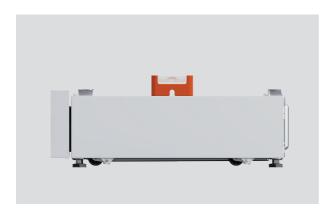

6. Refit door hinge and secure with hinge screws.

LEVEL PLINTH

1. Push the front of the plinth to open. Remove the divider before closing the drawer.

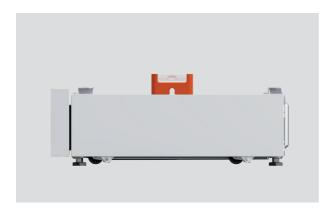

2. Place the plinth in its final install location. Adjust the feet using the supplied spanner until the plinth is level front to back and corner to corner.

3. Using the spanner provided, tighten the lock nuts against the base of the plinth to lock the feet in position on the ground.

LEVEL PLINTH

4. Recheck that the plinth is level, front to back and side to side. Once level, move the plinth to an accessible location to allow washer/dryer to be installed.

IMPORTANT!

1. Before tilting washing machine over remove dispenser drawer.

2. Tilt the washer back onto a protected surface such as the plinth carton.

Ensure cords and hoses are not crushed.

For new products, we recommend keeping the transit bolts fitted during this step.

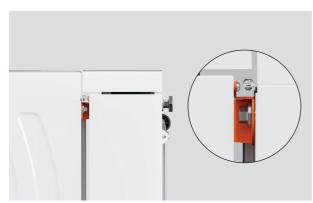

3. Unwind feet using the supplied spanner to remove.

4. Partially fit the four M10 bolts supplied with the storage plinth to the washer.

5. Using the spanner provided as a spacer, ensure a 4mm gap is left between the bolt head and the chassis.

6. Align all four brackets on plinth to the M10 bolts on the washer and slot into place. Tighten the front bolts with the supplied spanner.

7. Lift the washer upright, take care as storage drawer may open.

8. Tighten the rear bolts.

9. Roll washing machine into alcove and check alignment. To do this, use the supplied 6mm hex key, rotate clockwise to lower both sets of wheels via the adjustment screws.

10. Ensure all feet are raised off the floor before rolling the stacked products to the final install location.

11. Roll the products into the alcove.

Take care not to damage alcove when rolling product in.

12. Using the supplied 6mm hex key, rotate counter-clockwise to raise both sets of wheels via the adjustment screws.

13. Check that products are still level.

Adjust plinth feet if necessary.

14. Rotate clockwise to lower both sets of wheels and roll products out of alcove to resume stacking kit installation.

INSTALL STACKING KIT TO WASHER

1. Remove screws from washer using a screw driver or drill on the lowest torque setting.

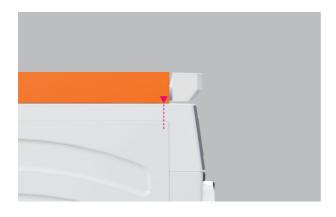

2. Fit Brackets onto the rear of the washer.

3. Screw the brackets into place using a screw driver or drill on the lowest torque setting.

INSTALL STACKING KIT TO WASHER

4. Place the stacking kit over the brackets. To ensure correct alignment, the front arrow on the stacking kit should line up between the console and the top panel.

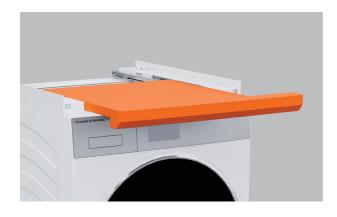

5. Ensure the stacking kit is centred to the washer. Lift the stacking kit and peel off the VHB tape to secure the front of the stacking kit in place.

6. Fit two screws between the stacking kit and the brackets to secure the back of the stacking kit in place. Screw positions differ depending on the washer/dryer variant.

INSTALL DRYER TO STACKING KIT

1. Push out the front of stacking kit so stacking kit tray is partially open.

2. Lift the dryer over the stacking kit and slide the dryer back until it stops.

Ensure the front dryer feet do not catch on the front edge of the stacking kit and the dryer remains centred on the stacking kit.

3. Remove the screw from the front of the dryer then fit front brackets.

INSTALL DRYER TO STACKING KIT

4. Re-fit screw to the dryer, and use supplied screw to secure brackets to stacking kit. Push the front of the stacking kit to close the tray.

REMOVE WASHER TRANSIT BOLTS

1. Using the supplied spanner, remove all four transit bolts from the back of the washer.

2. Pull the rubber grommets and spacers outwards to remove.

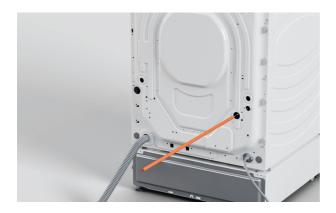

3. Using a Phillips screwdriver, remove the two side brackets. *Brackets apply to select models only.

REMOVE WASHER TRANSIT BOLTS

- **4.** Remove and discard the braces.
- *Brace applies to select models only.

5. Pull the transit rods outwards to remove.

Set aside for future use.

*Transit rod applies to select models only.

6. Cover the transit bolt holes using the supplied plugs.

LEVEL PRODUCT SET

1. We recommend levelling and installing stacked products into alcove before fabric care cabinet.

2. Partially roll stacked products into alcove and check alignment. To do this, use the supplied 6mm hex key, rotate clockwise to lower both sets of wheels via the adjustment screws.

3. Ensure all feet are raised off the floor before rolling the plinth to the final install location.

LEVEL PRODUCT SET

4. Using the supplied 6mm hex key, rotate counter-clockwise to raise both sets of wheels via the adjustment screws.

5. Align stacked washer and dryer with cabinetry.

1. Refer to the Planning Guide for service information.

2. Optional:

For dryers with displays, fit the drain hose extension if the dryer is to be plumbed.

IMPORTANT!

3. Display-free models:

Display-free models must be plumbed and the inter product communication cable correctly installed.

Plumbed installations: Ensure hose can be connected to a drain.

4. Remove caps from washer and dryer before fitting one of the communications cables.

Connect the washer and dryer via the communication cable.

5. Connect the angled end of the cold water hose (supplied with washer) to the dryer.

6. Connect the angled end of the short hose (supplied with dryer) to the cold water inlet on the washer.

7. Connect both hoses to the top of the Y joint supplied with the dryer.

8. Connect the straight hose to the bottom of the Y joint. The other end of the straight hose will connect to the cold tap.

9. Connect the angled end of hot hose to the orange outlet on the washer. If hot hose is not required, install a blanking cap.

10. Partially roll products into the alcove.

11. Route the power cables and hoses through service holes. Ensure power will remain accessible following install to allow access for any future product maintenance.

12. Install the drain hose guide to the back wall.

Refer to the planning guide for placement details.

13. Standpipe Installations:

Route the drain hose through the guide and place into the standpipe.

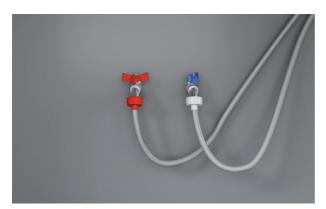

Ensure a maximum of 20mm of the hose is left exposed at the end of the standpipe.

14. Spigot Installations:

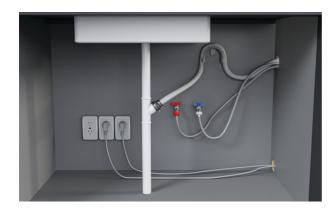

Drill out blanking insert from the spigot.

Route the drain hose through the guide and place into the spigot. Secure using a hose clamp.

15. Connect hoses to taps before turning on. Check for leaks at all connection points.

If possible, recheck for leaks 24 hours after installation.

16. Connect the power cables and check products are powered on and are connected.

17. Roll products into the alcove.

Take care not to damage hoses or cords.

18. Open plinth to access wheels. Turn the adjustment screw counter-clockwise to retract the wheels. Ensure the wheels are fully raised off the floor.

19. Check alignment and ensure required clearances are maintained. Adjust as required.

20. Once adjustment is complete, fit the plinth bolt hole covers.

21. Before using washer run a first cycle to ensure there are no leaks, that the product is level and water is turned on.

INSTALL FABRIC CARE CABINET

1. Plug the product in and push cabinet into cavity taking care not to damage cords.

Align flush to the front of the cabinetry.

2. Adjust the front of the product by turning the inner screw clockwise to lower the feet.

3. Adjust the rear of the product by turning the outer screw clockwise to lower the feet.

INSTALL FABRIC CARE CABINET

4. Check final alignment and ensure required clearances are maintained.

Adjust as required.

5. Clip drip tray into position.

INSTALLER CHECKLIST

TO BE COMPLETED BY THE INSTALLER. Have the packaging and transit bolts and rods been removed? Is the washer correctly levelled, feet are extended and cabinet corners are clear off the floor? Is the drain hose threaded through the hose guide 'U bend' (with no more than 20mm extended) and hooked into your standpipe or tub, or attached to a spigot? Is the hot hose connected to the hot value marked 'H'? Is the cold hose connected to the cold valve marked 'C'? Have the taps been turned on? Has the power cord been connected to an appropriate power supply and the power turned on? П Have you preformed a test cycle? Complete a DRUM CLEAN cycle with half-load amount of detergent and without a load to remove any residues remaining in the washer from the manufacturing

process.
