

# 90cm Series 9 Contemporary Pyrolytic Oven

Series 9 | Contemporary

This Series 9 oven provides ample capacity for diverse cooking needs, featuring nine functions including Pastry Bake, Rotisserie, and Fan Bake.

- Generous 100L total capacity, with nine oven functions
- Pyrolytic self-cleaning function breaks down food residue for an easy clean
- Built-in professional grade rotisserie

## DIMENSIONS

Height	478 mm
Width	895 mm
Depth	564 mm

## FEATURES & BENEFITS

### Cooking flexibility

This built-in oven has nine functions with pre-set temperatures, including Bake, Pastry Bake, and Fan Forced, allowing you to use a variety of cooking styles.

### Optimal Performance

Oven functions are pre-set with a simple touch of a dial. Enhanced by brilliant lighting and a large viewing window, the need to open the oven door is minimised, ensuring perfect cooking results while maintaining the oven's internal temperature.

### Generous Capacity

Designed for multi-shelf cooking, this built-in oven provides a 100L total capacity. The wide cavity allows for both side-by-side and multi-shelf cooking.

### Self-Cleaning

Our self-clean technology breaks down food residue at a very high temperature, leaving a light ash that's easily removed with a damp cloth. The enamel coated side racks don't need to be removed when using this function.

### Even cooking

Our ovens feature AeroTech™, a technology that circulates heat evenly, ideal for multi-shelf cooking. The professional-quality rotisserie roasts meat to succulent perfection, and a powerful grill ensures even and quick browning results.

### Complementary design

With their premium handle styling and stylish stainless steel finish, our built-in ovens are designed to match the rest of Fisher & Paykel's kitchen appliance family.

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
